

# MaxiFlex® Ultimate Cooling Gloves

**KEEPS HANDS COOL AND DRY!**

If you're looking for a glove that offers top-of-the-line comfort and dry grip, MaxiFlex Ultimate is the answer! These gloves are made with **AD-APT™ technology** that keeps hands 31% cooler than the standard MaxiFlex® Ultimate gloves. This innovative design allows these gloves to:

- **Regulate** - Keep hands cool to reduce sweat
- **Circulate** - 360 degree breathability moves air in and out
- **Ventilate** - Channels heat away
- **Provide Excellent Dexterity** - Rounded fingertips and increased sensitivity allow for detailed work

**AD-APT™ technology** is a proprietary system that releases microencapsulated, natural cooling agents as the temperature rises on the inside palm area of the glove. This keeps your hands dry, comfortable, and more productive all day long. Patented AIRtech® channels give these gloves the ultimate ventilation.
